Package size: Min. 3.94"W X 1.18"H Max. within inner arch size.

Sealing Point: 19.09"

The TPS 4000LT features the same standard TPS 2000 design, however, it was designed for heavy duty applications and low profile conveyor configurations. With its bottom seal location, there is no need for an operator to reposition bulky, oversized cartons. They are simply arranged on the spacious work table and easily moved by means of a roller top table, and strapped. Because of its low table height, the TPS 4000LT can be easily adapted to in-line operations with conveyor heights as low as 13 inches. The TPS 4000LT comes in standard green or special order stainless steel cabinets.
